PHYSICAL CONNECTION TEST

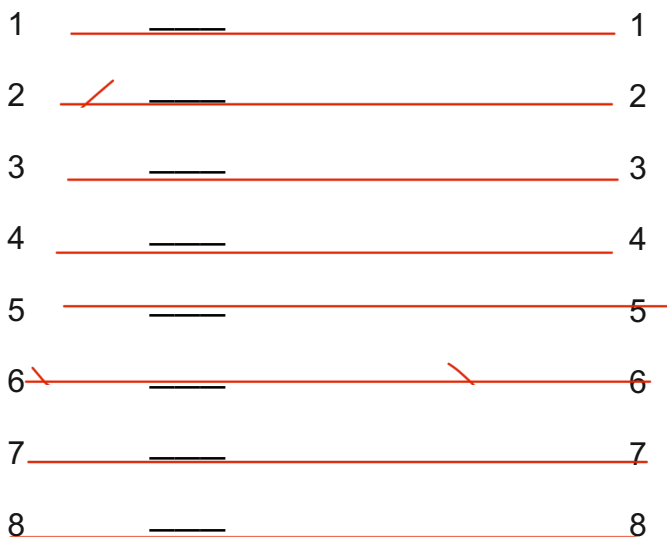

1, Types of mediums ?

Wired - UTP/STP cable, fibre. Wireless - radio waves, WiFi.

2, Write down switch 8-pins ?

- 1 White/Orange (TX+)
- 2 Orange (TX-)
- 3 White/Green (RX+)
- 4 Blue
- 5 White/Blue
- 6 Green (RX-)
- 7 White/Brown
- 8 Brown

3, Connect utp cable between two devices (Unlike devices -> Straight-through cable, pins 1-8 match on both ends)

4, Explain AUTO MDIX ?

Automatically detects connected device type and swaps TX/RX pairs electronically, so either straight-through or crossover cable works correctly without manual selection. Standard on modern switches/NICs.

5, Explain POE injector ?

Small device that adds power onto the ethernet cable, so a normal switch can power a camera or AP.

6, Explain POE switch ?

Switch that already gives power through the cable itself, no injector needed.

7, Explain types of nic & function ?

Wired/Ethernet NIC (RJ45), Wireless NIC (Wi-Fi), Fiber NIC (optical, high-speed), Onboard NIC (built into motherboard), Expansion NIC (PCIe add-in card). Function: converts device data into network signals and back, and provides the device's unique MAC address for Layer 2 ID.
